

{ Sample Itinerary 4 - 10 Days of Fishing }

- Day 1 -** Arrive to Bariloche, transfer to Estancia Arroyo Verde (Travel Time 1 1/2 hours). Begin your trip fishing the Rio Traful, and enjoying Estancia Arroyo Verde. Spend 2 days, 3 nights fishing on the Estancia.
- Day 2 -** Fish the Rio Traful, returning to the lodge for lunch. After lunch you will return to the river for a full evening of fishing. The Rio Traful has been regarded as one of the finest rivers in Argentina. With only one Estancia on the river offering fishing, you are assured to experience one of the highest regarded rivers, and estancias, of Argentina.
- Day 3 -** Fish a second day on the Estancia. Since the river is all walk/wading, you will have a chance to fish the pools and runs you missed on the first day.
- Day 4 -** After being pampered for a couple days, you will be ready for 2 days floating on the Limay Medio. Travel time from the Estancia is about 2 hours. We will set a camp for you on the river (in a private location), and be sure to make this time period the middle of the week. This is undoubtedly the best big, brown trout, river in Argentina, and maybe the world (excluding Sea-Runs, of course).
- Day 5 -** Float the Limay Medio all day, and then transfer to Estancia Collon Cura (Travel Time 1 1/2 hours). You will stay at the Estancia for 3 nights, and 2 days of fishing. You will float different private stretches of the Rio Collon Cura. This will give you a chance to be pampered again for a few nights. It is a basic, but well-appointed estancia, and the fishing is fantastic, generally speaking.
- Day 6 -** Float the Rio Collon Cura all day, taking lunch riverside. You will return in the evening to the Estancia. Your entire float will be inside the Estancia, utilizing all of their private accesses.
- Day 7 -** Float the Rio Collon Cura all day, but a different stretch. Again, you will return to the Estancia in the evening, for your final night at the ranch.
- Day 8 -** You will drive approximately 1 1/2 hours to the well known Estancia San Huberto, located on the Rio Malleo. This is definitely match-the-hatch fishing, and hunting for rising heads. The Malleo is considered Argentinas premier dry fly river. You will arrive to the Estancia, put your things away, and have lunch at the lodge. After lunch you will begin fishing the 20 miles of private water on the Estancia. You will return in the evening to the Estancia.

- Day 9** - You will spend another day fishing the Malleo, and again return to the Estancia for the evening.
- Day 10** - After leaving Estancia San Huberto, you will begin your 3 day float on the Rio Chimehuin. This river is one of the other all-time classics of Argentina. Only recently we started choosing to float this river for multi-day floats to maximize the fishing to be had. Traditionally one lodge has dictated the fishing by assigning pools to its clients. You don't get to really fish the river well this way, so we have opted for fishing the whole river
- Day 11** - This will be your final day on the Chimehuin, and your final day fishing with us. After you reach the take-out, you will then drive 2 hours back to Bariloche, where you will have a room waiting for you in town. You will go out on the town this evening for dinner and drinks, if you have the energy!
- Day 12** - Catch your flight to B.A.
